

Stellenausschreibung Harlan

Eingangstext

Harlan Laboratories is a leading provider of essential, pre-clinical and non-clinical contract research, research models, animal diets, and services to the pharmaceutical, biotech, medical device, agrochemical, and chemical industries, as well as universities, government, and other research organizations. Our focus is on providing customers with products and services to optimize the discovery and safety of new medicines and compounds. We have over 3,000 employees in 12 countries, but we act locally, understanding the value of close relationship and collaboration with our costumers. For the enhancement of our team in Switzerland we have an opening for a Human Health Safety Expert (Regulatory Toxicologist).

Job description

Human Health Safety Expert (Regulatory Toxicologist) / 1-11990

Responsibilities

In this position you will advise our clients on the data and testing needed to assess the safety of agro-chemicals and biocides to human health. You are responsible for planning, monitoring and summarizing toxicological and animal metabolism studies relevant for assessing the safety for operators, workers and bystanders. You will prepare safety assessments and expert reports for regulatory submissions.

Profile/Qualifications

We are looking for a professional with a scientific degree (PhD, MSc), with advanced training in toxicology and at least 3 years experience in regulatory toxicology within the agricultural or chemical industries, or in a CRO. Additional requirements are: good team player, self-motivated, skilled in advocacy/diplomacy and fluent in English (additional language skills would be an asset).

Harlan Offer

We offer you good terms of employment and excellent social contributions, a modern and professional organization in an international environment.

Application

Please submit your complete application documents to Harlan Laboratories Ltd., 1-11990, Human Resources, Zelgliweg 1, 4452 Itingen / Switzerland, hr1croeuropa@harlan.com
